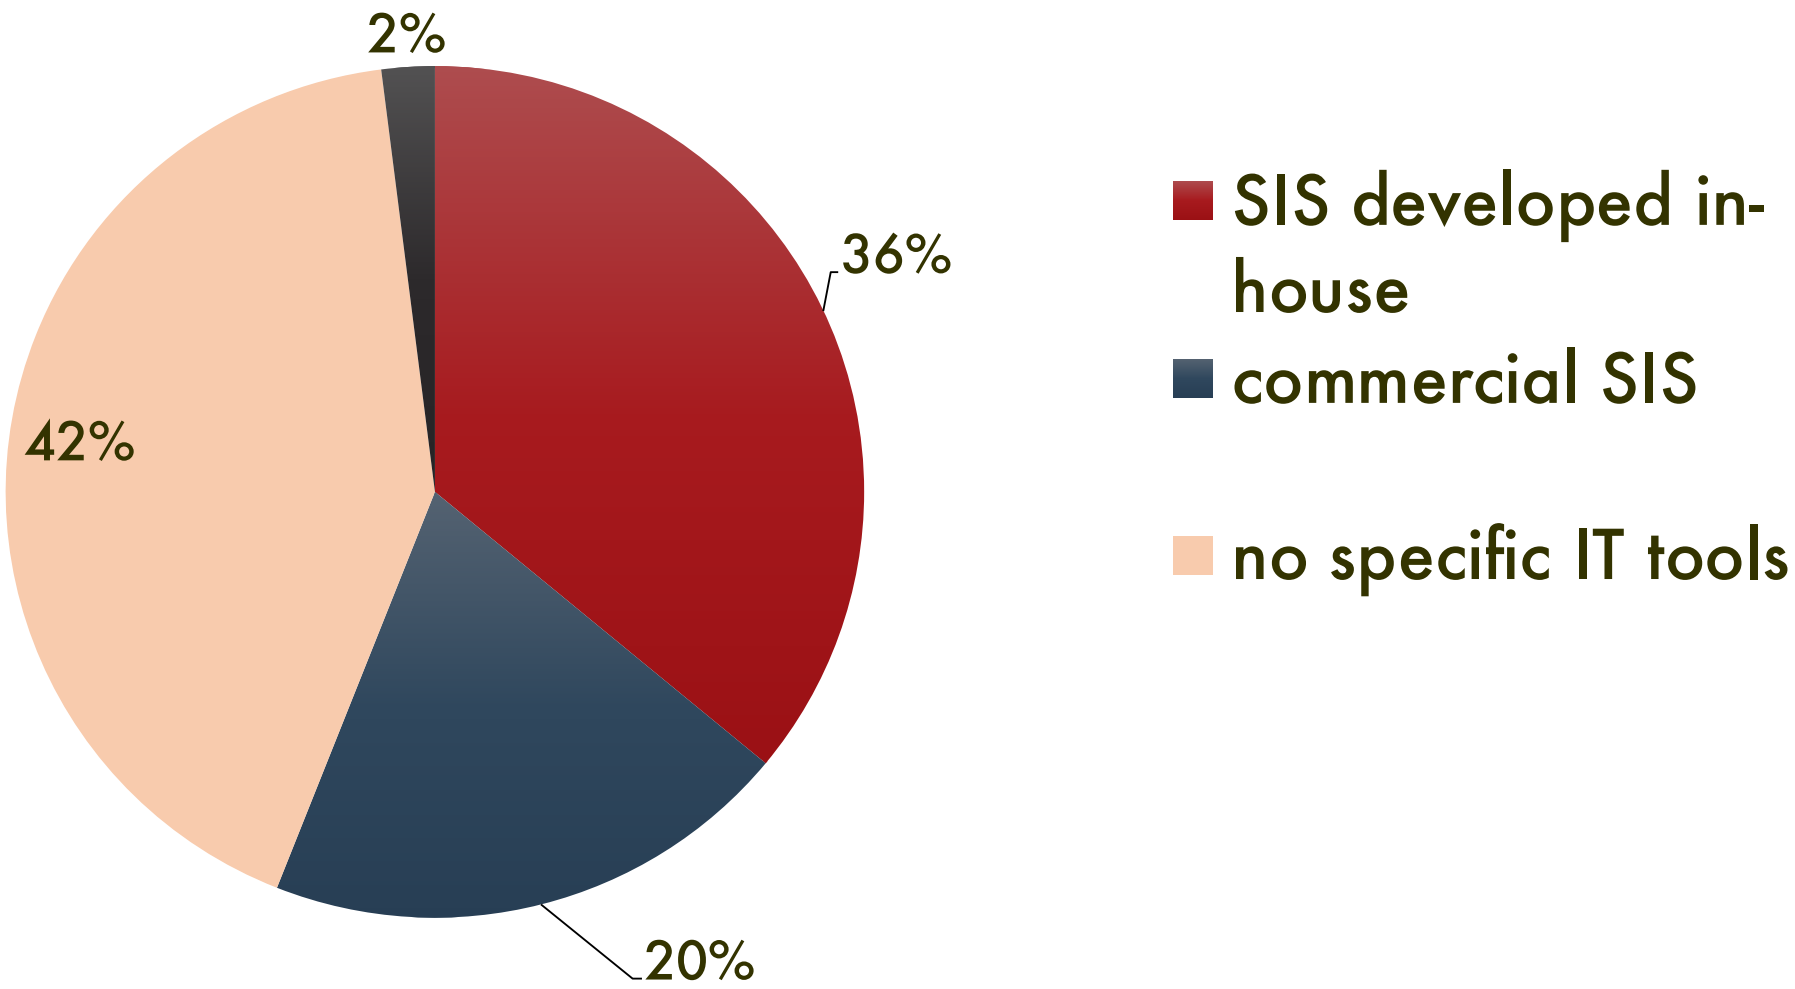
@StefanJahnke

Network

Mapping of IT infrastructure among ECHE holders 2016



Aim:
Make different systems talk to each other (exchange data)

1. Build Infrastructure for connecting systems

2. Data standard for student data

Use-Cases

- Sharing institutional information
- Inter-institutional agreements
- Nomination mobile students
- Sending/Receiving ‘Transcripts of Records’
- Converting grades
- Reporting student data (Mobility Tool+)

2015-2017: Proof of concept

- Building of a **Registry** as centralised point of identification
- **APIs** for main use-cases based on common student data standard
- **Reference Connector** as example implementation for connecting system to the Network
- Testing and proof of concept

2018-2020: Industrialisation

- Connecting of Commercial software providers
- **Competence Centre** development
- Additional **APIs**
- **Early Adopter** Testing
- Official launch of the Network

Workshops in the afternoon

How to connect your in-house IT system to the EWP Network
