

## Seminar and Round Table

### **“New paths for human capital development in companies and organizations”**

#### **Human capital, labour market and training: international perspectives**

The speech given by Rita Asplund will focus on challenges facing education and training systems (ETSs). Broadly speaking, these challenges arise both outside and inside ETSs. Among the challenges arising outside the ETS, most attention will be paid to present-day trends in labour markets. Among the challenges arising inside the ETS, the main focus will be on the renewed interest in apprenticeships. In relation to this, the speech ends with some cautious remarks on the usefulness of certain widely-used indicators for describing the situation of young people.
