About the publications

Strengthening Community University Research Partnership: Global Perspectives

This book outlines a number of important trends, challenges and approaches associated with how research partnerships are initiated, supported, and evaluated through a comparative study of different types of institutional arrangements. This includes a detailed overview of a global survey administered in over fifty countries and four languages, and twelve country case studies demonstrating strong institutional and policy support for Community University Research Partnerships (CURP).

Institutionalizing Community University Research Partnership

This manual serves both as a handy reference and a ready tool kit for university and college administrators interested in establishing and improving CURP initiatives in their institutions. It provides practical guidelines and steps that will help deliver on policy commitments made to promote Community University Engagement (CUE)/Community University Research Partnerships in Higher Educational Institutions (HEIs).
